Lynn,

This sounds ok, I will get the form sent in, we do have some stone we promised to bury or remove on the south side, in an area about 40'x40', we will need to do that, so that area would be disturbed. That small disturbance was not dug into or plants removed, so we would just scrape down to the surface to remove, plants would be viable there soon, but if we bury it, that area would be a bit larger. Thanks, Ben.

Ben, I have discussed with the BLM the possibility of closing this file and transferring the \$4,500 surety to the Big Dry Valley permit (S/025/0015) They are favorable to do this, and are planning to visit the site next week. In anticipation that this will happen, you please fill out the attached form (form MR-SITE), which is an official request to close the file.

This will allow us to approve the revised NOI for the Big Dry Valley Quarry (S/025/0015)
